

Project Design Phase
Proposed Solution Template

Date	02 July 2026
Team ID	
Project Name	India's Agricultural Crop Production Analysis
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Farmers, government policy analysts, and agribusiness investors face challenges in analyzing large volumes of agricultural data due to scattered information, lack of interactive visualization, and difficulty identifying crop production trends across different states and seasons.
2.	Idea / Solution description	Develop an interactive Tableau dashboard that visualizes India's agricultural cultivation data (1997–2021). The dashboard includes state-wise, crop-wise, season-wise, and year-wise analysis using charts, maps, KPIs, filters, and Tableau Stories for easy decision-making.
3.	Novelty / Uniqueness	The solution combines multiple agricultural insights into one interactive dashboard. Users can explore historical trends, compare states and crops, apply filters, and view data through dynamic visualizations instead of static reports.
4.	Social Impact / Customer Satisfaction	The dashboard helps farmers choose suitable crops, supports policymakers in planning agricultural strategies, and enables investors to identify profitable opportunities. It improves accessibility to agricultural information and encourages data-driven decisions.
5.	Business Model (Revenue Model)	The dashboard can be offered as a subscription-based analytics platform for agribusiness organizations, government agencies, research institutions, and educational organizations. Customized reports and consulting services can generate additional revenue.
6.	Scalability of the Solution	The solution can be expanded by integrating real-time weather data, market prices, satellite imagery, crop prediction models, and machine learning techniques. It can also be adapted for agriculture in other countries or additional sectors.
