Project Name	India's Agricultural Crop Production Analysis
Maximum Marks	2 Marks

Customer Problem Statement:

PERSON:1

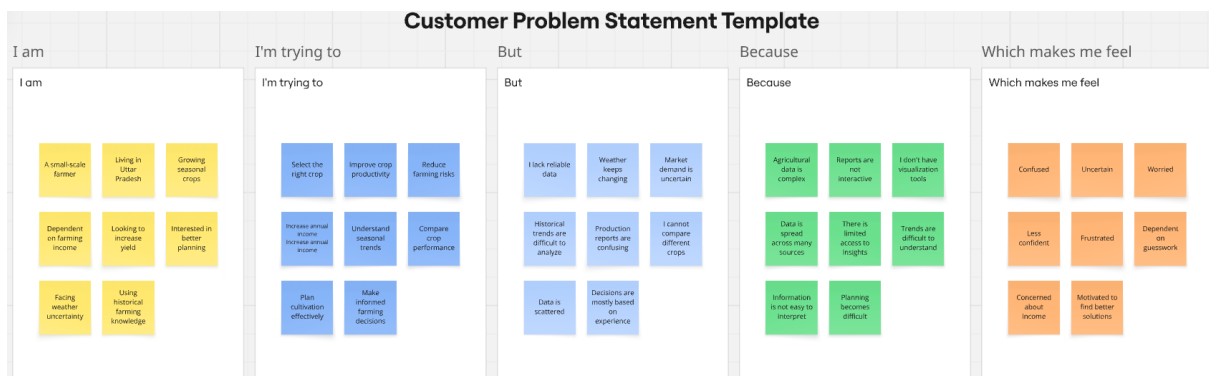

I am a small-scale farmer trying to make informed crop planning decisions, but I lack clear and accessible insights into historical agricultural data because existing reports are complex and difficult to interpret, which makes me feel uncertain about selecting the right crops and improving productivity.

PERSON:2

I am a Government Policy Analyst trying to identify regions with low crop productivity and improve agricultural policies, but I cannot easily analyze historical agricultural data because the information is scattered and difficult to visualize, which makes me feel less confident in making informed policy decisions.

PERSON:3

I am an agribusiness investor trying to make informed investment decisions in the agricultural sector, but I cannot easily identify profitable crops and high-performing regions because historical agricultural data is not presented in a clear and interactive format, which makes me feel uncertain about investment risks.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	• A small-scale farmer • Growing seasonal crops.	• Select the right crop • Improve crop productivity	• I lack reliable data • Weather keeps changing	• Agricultural data is complex • Reports are not interactive	• Confused • Uncertain
PS-2	• Government Policy Analyst • Working for the Ministry of Agriculture	• Identify low-performing regions • Improve agricultural productivity	• Agricultural data is scattered • Reports are difficult to analyze	• Data comes from multiple sources • Reports are mostly static	• Frustrated • Responsible
PS-3	• Agribusiness Investor • Investing in agriculture	• Identify high-performing crops • Find profitable investment opportunities	• Agricultural data is difficult to interpret • Market trends are not clearly visualized	• Agricultural datasets are large and complex • Information is spread across multiple sources	• Curious to explore better insights • Motivated to make informed decisions
