Scenario: [India's Agricultural Crop Production Analysis]

	Entice	Enter	Engage	Exit	Extend
	How does someone become aware of this service?	What do people experience as they begin the process?	In the core moments in the process, what happens?	What do people typically experience as the process finishes?	What happens after the experience is over?
Experience steps	Need agricultural insights Learn about the Tableau dashboard Search for reliable agricultural data	Open the dashboard Select state, crop, and year filters	Analyze crop production Compare regional performance Study seasonal trends Review historical data Identify key insights	Make informed decisions Download or save reports	Reuse the dashboard Share insights with others Monitor future agricultural trends
Interactions What interactions do they have at each step along the way? - **People:** Who do they see or talk to? - **Places:** Where are they? - **Things:** What digital touchpoints or physical objects do they use?	Search online Read reports Receive recommendations	Access Tableau dashboard Apply filters	Explore charts View maps Compare data Analyze KPIs Read Tableau Story	Export reports Save dashboard views	Share reports Review dashboard regularly Apply insights in future planning
Goals & motivations At each step, what is a person's primary goal or motivation? ("Help me..." or "Help me avoid...")	Find reliable agricultural information Improve decision-making Reduce uncertainty	Access meaningful data Understand production trends	Identify high-performing crops Compare states and seasons Discover useful insights Support planning Reduce risks	Make data-driven decisions Improve productivity	Continue using the dashboard Achieve long-term improvements Support sustainable agriculture
Positive moments What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?	Easy access to data Reliable information User-friendly platform	Simple navigation Interactive filters	Clear visualizations Easy comparisons Quick insights Better understanding Interactive dashboards	Confident decisions Time saved	Better planning Increased productivity Improved decision-making
Negative moments What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?	Limited awareness Difficult to find reliable data Scattered information	Learning dashboard features Large datasets	Complex analysis Too much information Limited historical understanding Time-consuming comparisons Data interpretation challenges	Need additional analysis Limited future predictions	Requires regular updates Needs more advanced features Market changes frequently
Areas of opportunity How might we make each step better? What ideas do we have? What have others suggested?	Increase dashboard awareness Provide user training Improve accessibility	Better onboarding User guides	AI-powered insights Crop recommendations Weather integration Market price analysis Advanced filters	Automated reports Downloadable summaries	Mobile application Real-time data updates Predictive analytics
